disorders associated with cortisol excess and insufficiency although rare deserve the

attention of the entire medical community because of high associated morbidity and mortality both diagnosis and management of hypo and hypercortisolism are challenging and disease presentation at both clinical and laboratory level is not always definite new tools are available for non invasive and early diagnosis and the choice of treatment should be tailored to each patient to improve quality of life through the regulation of the levels and rhythm of hormonal secretion while limiting complications associated with the disease and therapies in this new volume top experts have contributed chapters on the pathognomonic epidemiological clinical radiological and laboratory aspects of the various disorders associated with altered cortisol secretion they also present information on still debated standpoints on management cortisol excess and insufficiency is a valuable reference book for those wishing to have a reasoned and broad overview of the pathophysiology and management of disorders associated with hypo and hypercortisolism

in our contemporary era while diversity is acknowledged true inclusion remains an elusive goal as society grapples with multifaceted challenges the great resignation and movements like metoo have exposed workplace culture issues while events like black lives matter protests underscored glaring disparities simultaneously rapid technological advancements introduce new risks from cyber exploitation to biased ai these complexities demand innovative solutions that address these challenges fostering environments of genuine respect understanding and collaboration applied research approaches to technology healthcare and business edited by dr darrell norman burrell emerges as a transformative force this dynamic anthology presents insights research and actionable recommendations from diverse fields and perspectives taking an interdisciplinary approach to unravel workplace dynamics health disparities and technological advancements topics include inclusive leadership equitable technology bias in ai and forging collaboration across religious and cultural differences by harmonizing voices and expertise this book offers transformative approaches for individuals educators and professionals this rich resource empowers readers to navigate today's societal challenges equipping them to become architects of a more inclusive equitable and harmonious future across technology healthcare and business

in 1763 reverend edmund stone took the first step toward the discovery of one of the most commonly used medicines when he noted that the bark of the english willow was an effective treatment for patients suffering from a fever this synthesised compound would eventually become known as one of the most prescribed drugs for acute and chronic pain symptoms however through years of trial and error this drug has been the subject of many controversial issues aspirin serves as one of the leading agents for cardiovascular treatment in women however many patients have experienced negative side effects of internal bleeding and lining damage due to strong amounts of acid in the drug aspirin is often effective when taken in small doses this book brings together medical and biological research these involve

neurological effects clinical and experimental reactions lung exposure withdrawal symptoms cardiovascular side effects uses in cancer treatment and many other application areas

epidemiologic studies in cancer prevention and screening is the first comprehensive overview of the evidence base for both cancer prevention and screening this book is directed to the many professionals in government academia public health and health care who need up to date information on the potential for reducing the impact of cancer including physicians nurses epidemiologists and research scientists the main aim of the book is to provide a realistic appraisal of the evidence for both cancer prevention and cancer screening in addition the book provides an accounting of the extent programs based on available knowledge have impacted populations it does this through 1 presentation of a rigorous and realistic evaluation of the evidence for population based interventions in prevention of and screening for cancer with particular relevance to those believed to be applicable now or on the cusp of application 2 evaluation of the relative contributions of prevention and screening 3 discussion of how within the health systems with which the authors are familiar prevention and screening for cancer can be enhanced overview of the evidence base for cancer prevention and screening as demonstrated in epidemiologic studies in cancer prevention and screening is critically important given current debates within the scientific community of the five components of cancer control prevention early detection including screening treatment rehabilitation and palliative care prevention is regarded as the most important yet the knowledge available to prevent many cancers is incomplete and even if we know the main causal factors for a cancer we often lack the understanding to put this knowledge into effect further with the long natural history of most cancers it could take many years to make an appreciable impact upon the incidence of the cancer because of these facts many have come to believe that screening has the most potential for reduction of the burden of cancer yet through trying to apply the knowledge gained on screening for cancer the scientific community has recognized that screening can have major disadvantages and achieve little at substantial cost this reduces the resources that are potentially available both for prevention and for treatment

dual antiplatelet therapy for coronary and peripheral arterial disease is a complete reference containing updated information on the advantages and disadvantages of dual antiplatelet therapy its duration composition and anticipated changes the basis for dapt in arterial disease is discussed allowing readers to understand platelet physiology and its relevance to ischemic events data on shorter than usual duration of dapt and on extended therapy beyond the recommendation of current guidelines is presented in great detail summarizing a large body of evidence into concrete relevant recommendation that is readily adaptable by practicing clinicians a clinically relevant and updated compendium of data pertaining to this field is also presented as well as the anticipated trends and innovations likely to occur in the next 3 5 years

summarizes a large body of evidence into concrete relevant recommendations that is readily adapted by practicing clinicians explores the current status of dapt controversial topics and future developments and trends in this field edited and contributed by renowned cardiologists in the field

this reference places the latest information at users fingertips and a more streamlined format makes it easy to find the exact information quickly and conveniently includes access to a companion site for additional resources

from decades natural products have been a significant source of health remedies the use of nature oriented bioactive substances in the development of new drugs and traditional medicine is still the priority of the pharmaceuticals more than 80 to 85 of people throughout the world rely on traditional medicine tm as their primary form of healthcare the easily available tm mostly herbal products prepared from whole herbs or their extracts have a significant economic role in many asian african american and european nations therefore it has become urgent to increase the tm and its constituents quality safety and effectiveness this can only be accomplished by scientifically validating the lead compounds in tm s chemical foundation and their mode of action thanks to the advanced technologies and equipment s which now has made it easy to create the scaffolds of natural products in the lab saving a great deal of time as compared to isolating the natural product from its source
