if one takes a panoramic view of hegel s entire philosophical endeavor the endeavor to come to grips with and to be committed to reality in the concrete one is struck by one inescapable idea the hegelian enterprise is an extraordinarily unified and grandiose attempt to elaborate one concept which hegel sees as the root of all intelligibility the concept of god whatever that term is going to turn out to mean the question with which we are faced is neither whether hegel is correct in what he says nor whether his interpreters are justified in what they say of him rather the question is one of finding out just what hegel does say and of determining what impact that can have on our own thinking why then the concept of god the answer is to be found in the culmination of the entire hegelian system the philosophy of absolute spirit only in the light of absolute spirit is anything hegel says intelligible in hegel s view absolute spirit is in fact to be identified with god and that therefore only if hegel s concept of god is intelligible will anything hegel says be intelligible from the introduction

in a world that often calls you to travel away from the truth of who you are here is something to bring you home you are here on earth with a specific purpose a specific light to shine and it is only after forgetting all that you have been told about what you should be that you can begin to remember who you truly are the words in this book will activate your own knowing of this truth you will feel inspired to love yourself deeper than ever before and you will

remember your connection to your soul essence through the deeper knowing that your body is a vessel for the light that you are you will experience a silencing of the voices in the mind and an awakening of the voice that is your own authentic inner divinity

when leo xii promulgated aeterni patris in 1879 he stipulated that the leonine or official edition of the summa

should always be printed in conjunction with cajetan s commentary for five hundred years they were studied together generations were trained by reading through the summa article by article with cajetan s commentaries in hand early printed editions of the summa typically included them in a talmudic arrangement as marginal text running around each article by aquinas this edition imitates that example recently serious thinkers of all denominations and none have found new reasons to be interested in st thomas his text is deceptively simple yet important issues are handled in every article sometimes below the surface cajetan extracts these hidden issues and explains and elaborates on them with remarkable affinity to modern analytical philosophy part of that affinity lies in the use of modal logic a tool whose importance was overlooked between the renaissance and the twentieth century the time is ripe for an analytically inspired translation of thomas hence this volume never until now has cajetan s commentary been put into english in its entirety william marshner s translation is consistent with fidelity to the technical force of the original the translator s footnotes acknowledge what empirical science has made obsolete in the work of st thomas and also make clear how much today s science would have saved thomas useless labor this volume will for the first time make cajetan s help available to the modern reader

book one of the summa contra gentiles series studies god s existence nature and substance his perfect actuality the autonomy of his knowledge the independence of his will the perfection of his life and the generosity of his love the summa contra gentiles is not merely the only complete summary of christian doctrine that st thomas has written but also a creative and even revolutionary work of christian apologetics composed at the precise moment when christian thought needed to be intellectually creative in order to master and assimilate the intelligence and wisdom of the greeks and the arabs in the summa aquinas works to save and purify the thought of the greeks and the arabs in the higher light of christian revelation confident that all that had been rational in the ancient philosophers and their followers would become more rational within christianity book 2 of the summa deals with creation book 3 providence and book 4 salvation

includes american institute of christian philosophy proceedings of the american institute of christian philosophy
